RGB+CCT Wall-mounted Underwater Light (LoRa 433)

Model No · UW01 / UW02

Product Features

This wall-mounted underwater lamp is designed and developed for underwater lighting: It's with RF module inside. We use LoRa modem technology to fulfill the super long distance controlling. It's controlled by our 433MHz remote control or 433MHz Gateway for smartphone control. The lamp is with Red.Green.blue.cool white and warm white LED chips in side to fulfill the color changing, brightness dimming and dynamic mode controlling. Easy operation.

16 millions of colors to choose

Color temperature 2700~6500K

Dimmable saturation control

Waterproof and dustproof IP68 grade IP68

Attention

- 1. Please check whether the input voltage supply is in accordance with the lighting fixtures, and please check the connection of both the cathode and anode
- 2. The working voltage is DC24V, the lighting will be damage if the voltage is higher than DC24V.
- 3. Non-professional user cannot dismantle the lighting directly, otherwise it may damage the lighting.
- 4. The working temperature is -20~45°C.
- 5. Please do not use lighting around the mental area and high magnetic field, otherwise, it will badly affect the control distance.
- 6. Users must be correct, strict and solid to install the light.
